San Juan Iron is the premier manufacturer of high quality hand-forged, custom-made ironworks.

We specialize in creating astounding custom exterior and interior iron doors, driveway gates, stairway railings, wine cellars, and ornamental accents that complement your sophisticated residential projects.

With over 20 years of experience in the wrought iron industry, the company founders created San Juan Iron, to focus on their passion for iron doors and create an affordable path to providing luxury iron doors without any complexity.

Clients can choose amongst a wide variety of styles and designs ranging from extremely decorative and ornate to simple and sleek contemporary designs.

San Juan Iron doors are designed for homeowners who, quite simply, demand the best.

We distinguish ourselves because we are not mass producers, nor semi-custom producers.

At San Juan Iron our doors are 100% handmade by experienced artisans. We think a machine will never replicate the unique qualities of a door made by hand.

MAIN ENTRY DOORS

Our contemporary entry doors are a luxurious addition to your home.

The sleek lines and large glass windows allow natural light into your home giving it a clean and stylish look.

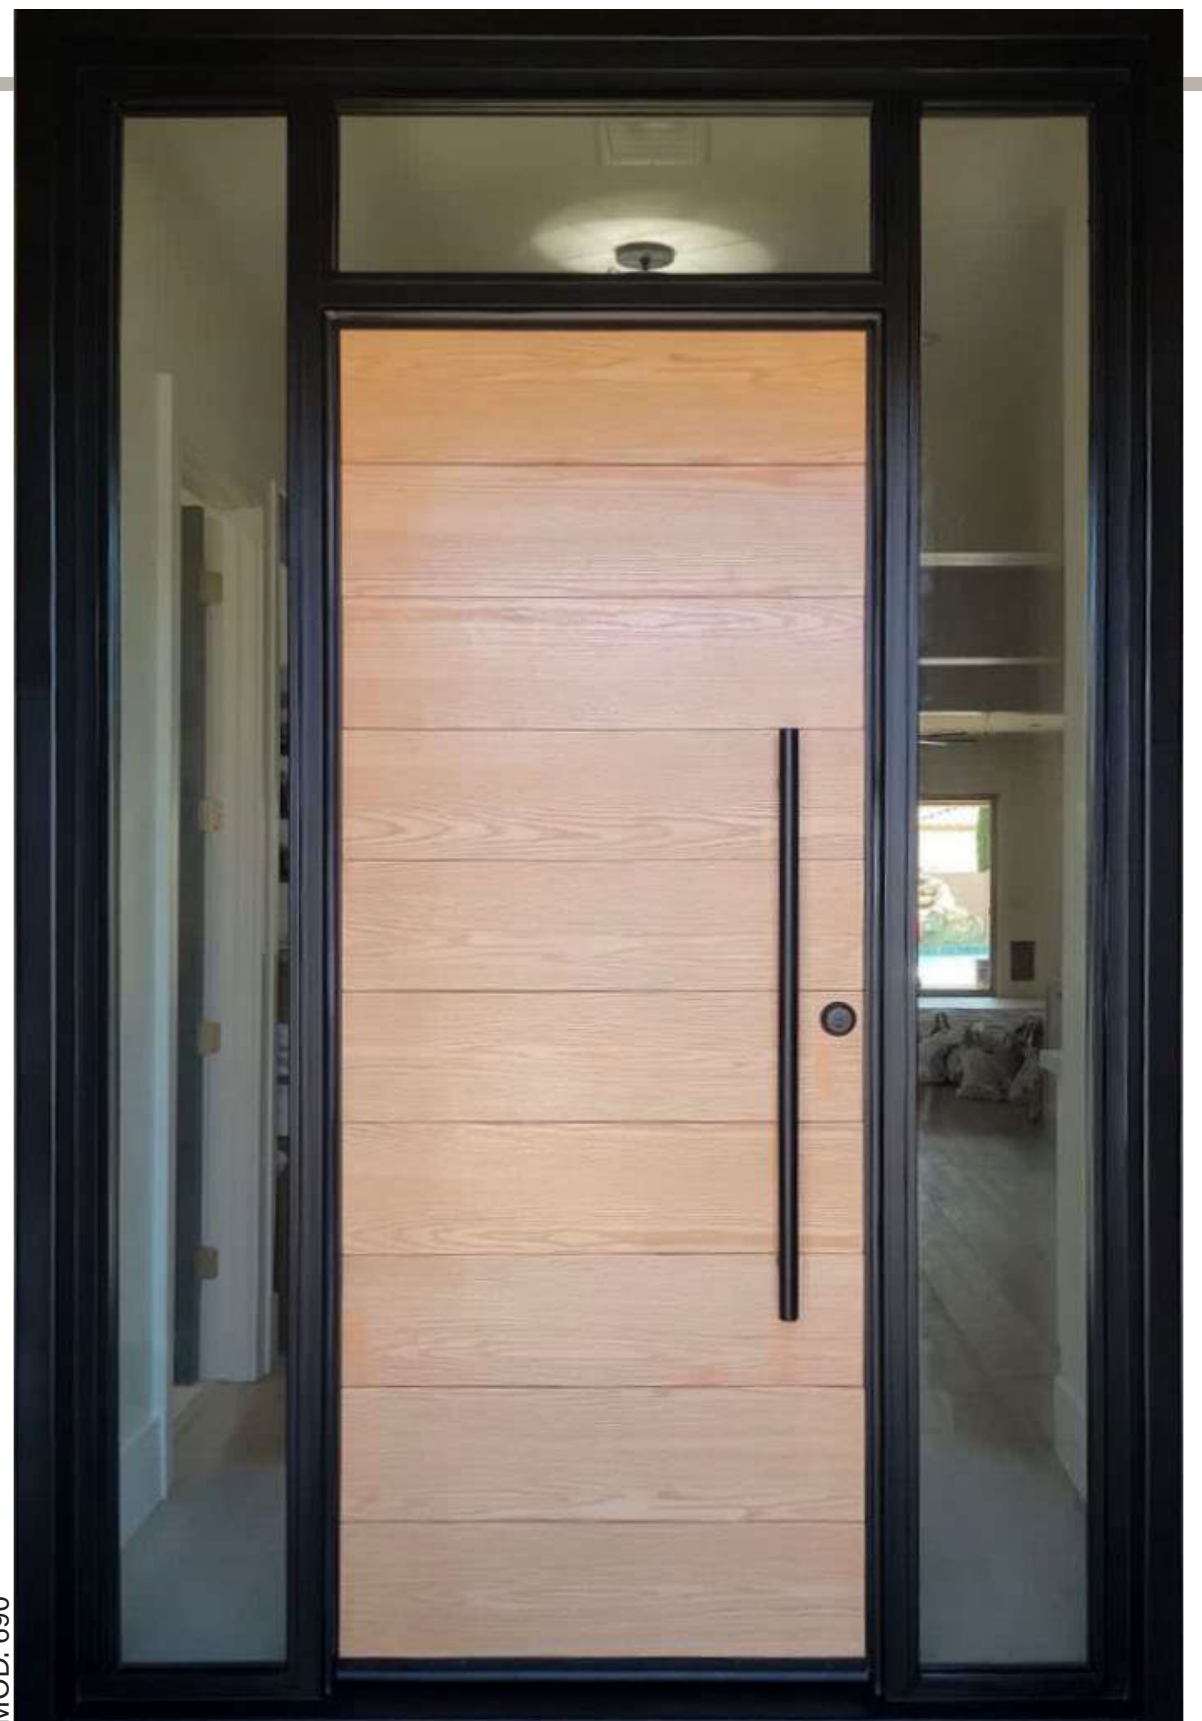

The overlayed hand-hammered copper sheets in this iron door give it a modern and elegant style.

DOUBLE DOORS

MOD. 711

MOD. 685

In **San Juan Iron** we pride ourselves on our ability to control all aspects of the process, from design to installation. Our artisans know that small details make the big difference.

We put great attention to detail; our superior craftsmanship is reflected in the fluidity of scrollworks, the seamless welding and the hand-twisted scrolls that are used in our doors.

All of our doors have tempered double pane 7/8" thick windows for energy efficiency and noise reduction.

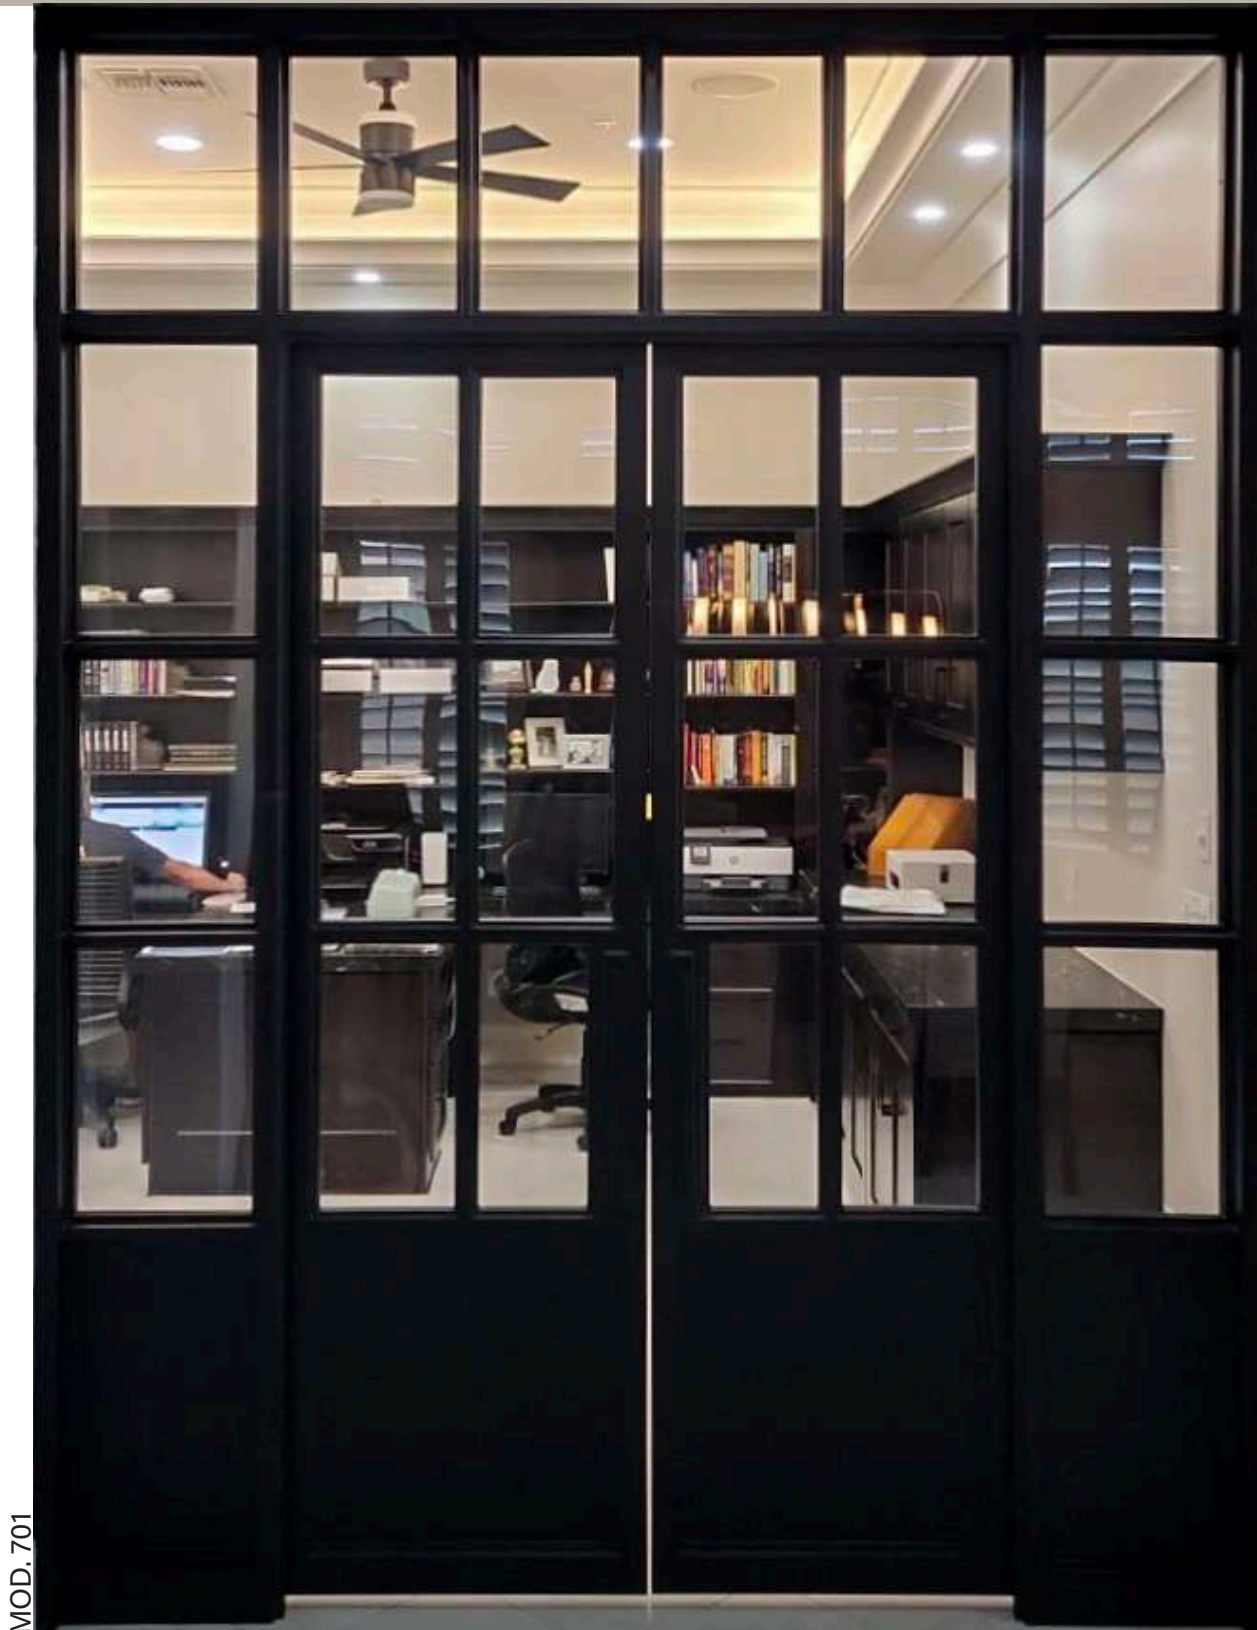

Windows are completely operable, this facilitates the cleaning of the glass.

Our iron entry doors are the only ones in the industry to be 4 in 1. We have innovated iron entry doors and built ours to be:

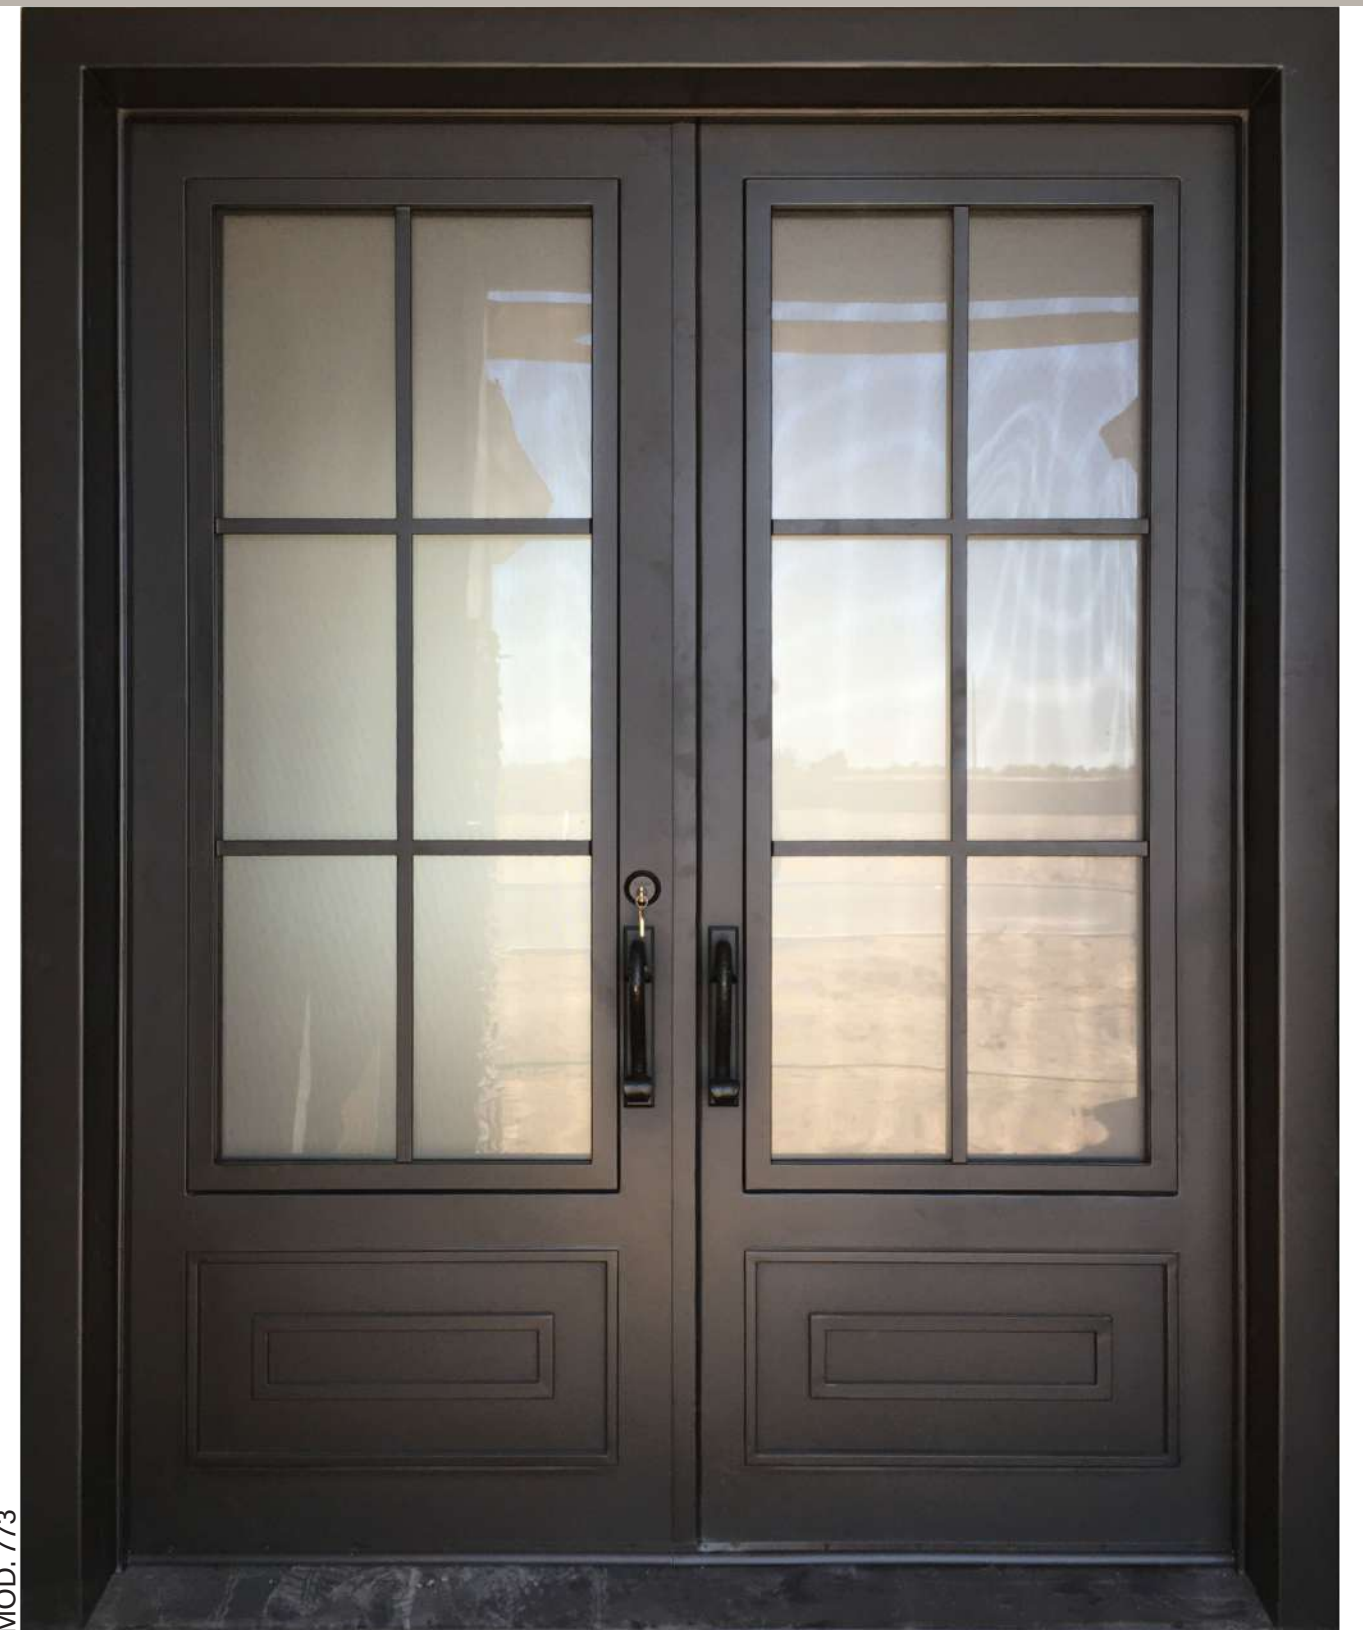

- 1. Main Door.***
- 2. Security Door.***
- 3. Window.***
- 4. Screen for proper ventilation.***

MOD. 585

With the industrial trend going strong, hot rolled steel adds a custom look. Plus having hickory wood in this door, enhances its natural finish.

MOD. 644

Our custom iron entry doors are built to last and add substantial curb appeal to your home.

Enjoy the place you call home!

MOD. 632

Where the warmth of wood meets the strength of steel.

MOD. 582

A door is the warm greeting as you enter your home.

Our doors are built with high quality materials to protect your home.

BIFOLD DOORS

MOD. 614

Bifold doors will create an impressive connection between the inside of your home and the outside.

San Juan Iron bifold doors give a cosmopolitan and elegant look to your home.

Additionally, our doors magnify your home's appearance, increasing its value immediately.

Our doors can be built to your exact specifications; any size, design, or shape.

MOD. 674

MOD. 610

TRIFOLD DOORS

At **San Juan Iron** we have experience in all project types: residential, commercial, and historical buildings.

We accomodate to special requirements, size, or style.

We visit your home to give you a free quote, but also we measure ourselves the projects you need. This assures you receive a perfect product that will fit flawlessly in your place.

MOD. 613

Our design department will provide some ideas for you in CAD so you can clearly visualize your project prior to fabrication.

We have no hidden fees. Any design includes standard frame, double-pane tempered glass, weatherstripping, custom threshold, mineral wool insulation, handles from our catalog, heavy duty ball bearing hinges, water deflector, roller catch, single cylinder deadbolt and powder coat finish.

All our designs are 100% custom. Your door can be built with any special specification you require.

San Juan Iron offers:

- Superior customer service.
- Professionally trained installers.
- Short delivery dates.
- Structural and installation warranty.

MOD. 709

Let our design department help you create an enduring masterpiece that ensures beauty and individuality.

San Juan Iron has been providing quality craftsmanship for over 20 years.

Our highly skilled artisans still forge by hand, fabricating one of a kind works of art.

Our products are meant to last a lifetime and will also make a wonderful addition to your home.

FABRICATION PROCESS

Our manufacturing facility in Magdalena de Kino, México, utilizes the latest technology and premium materials for the insulation and finishing of our products. Additionally, the actual door construction is done by hand using forges and artistry to create a matchless hand-forged finished product that is an exceptional work of art.

San Juan Iron recognizes the importance of translating our client's criteria into original and functional designs.

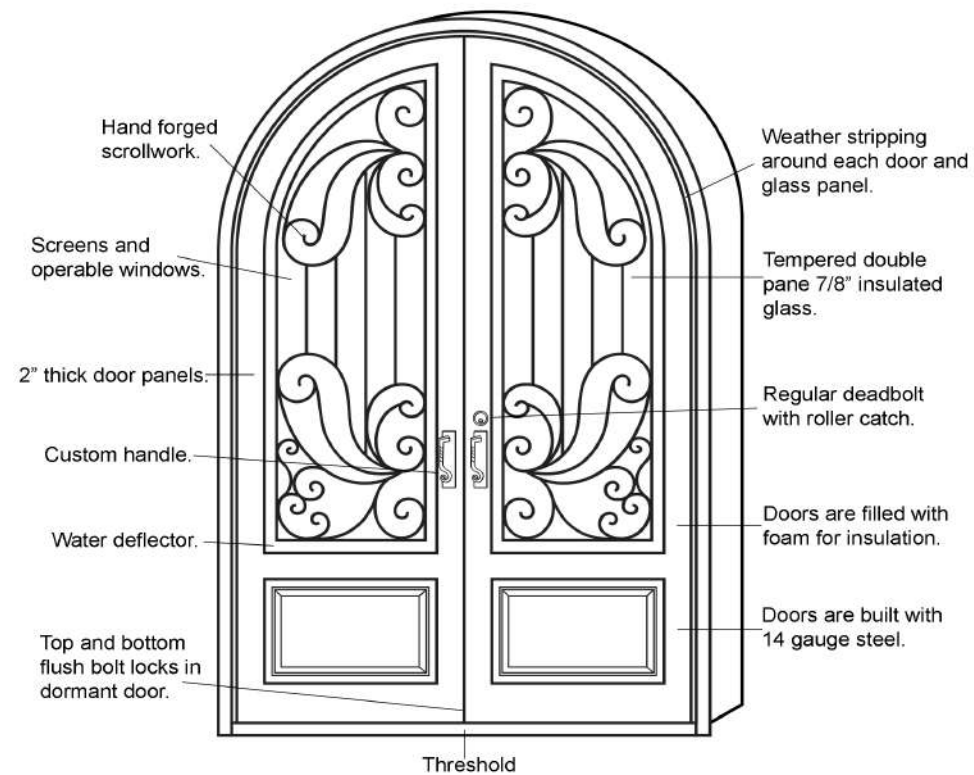

Our representatives work with top-notch architects, contractors, builders, interior designers, and home owners to gather technical specifications and the vision of what it's desired.

We will then create the perfect design for the unique taste and the distinctive style of each of our clients meeting both criteria of technical accuracy and beauty.

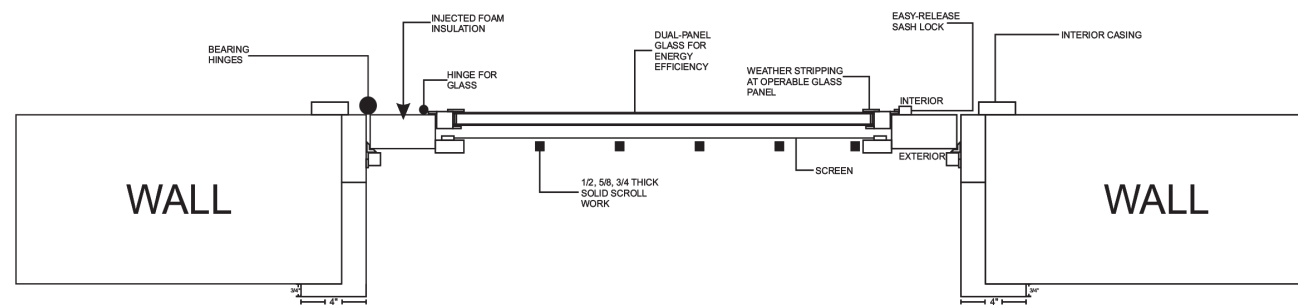

We offer the most inclusive warranty in the wrought industry. Doors and jambs are manufactured with 14 gauge steel to ensure durability. Special heavy-duty hinges come standard for ease weight distribution and functionality of the door.

Iron scroll work is available in 1/2" or 5/8" based on design.

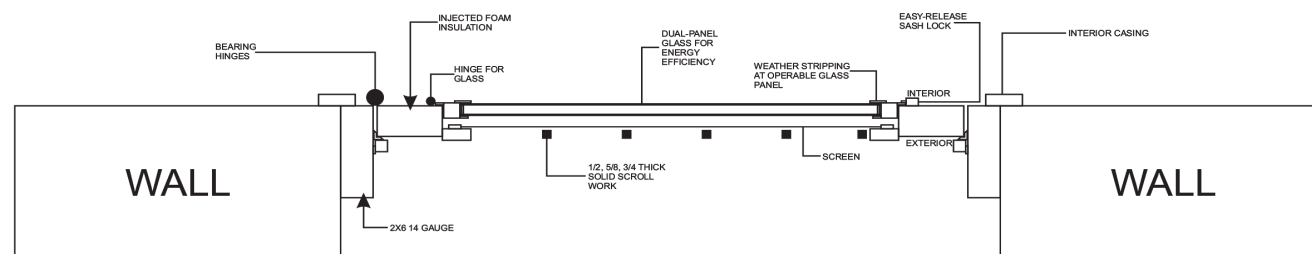

Cross section of standard door with special frame.

Cross section of standard door.

We have a large selection of glass to choose from. All glass selections are 3/4" tempered double-pane thick.

This helps with energy efficiency.
